

THE ACCELERATOR^{FOR} STRATEGIC AGILITYTM

Building Sustainable Strategic Capacity

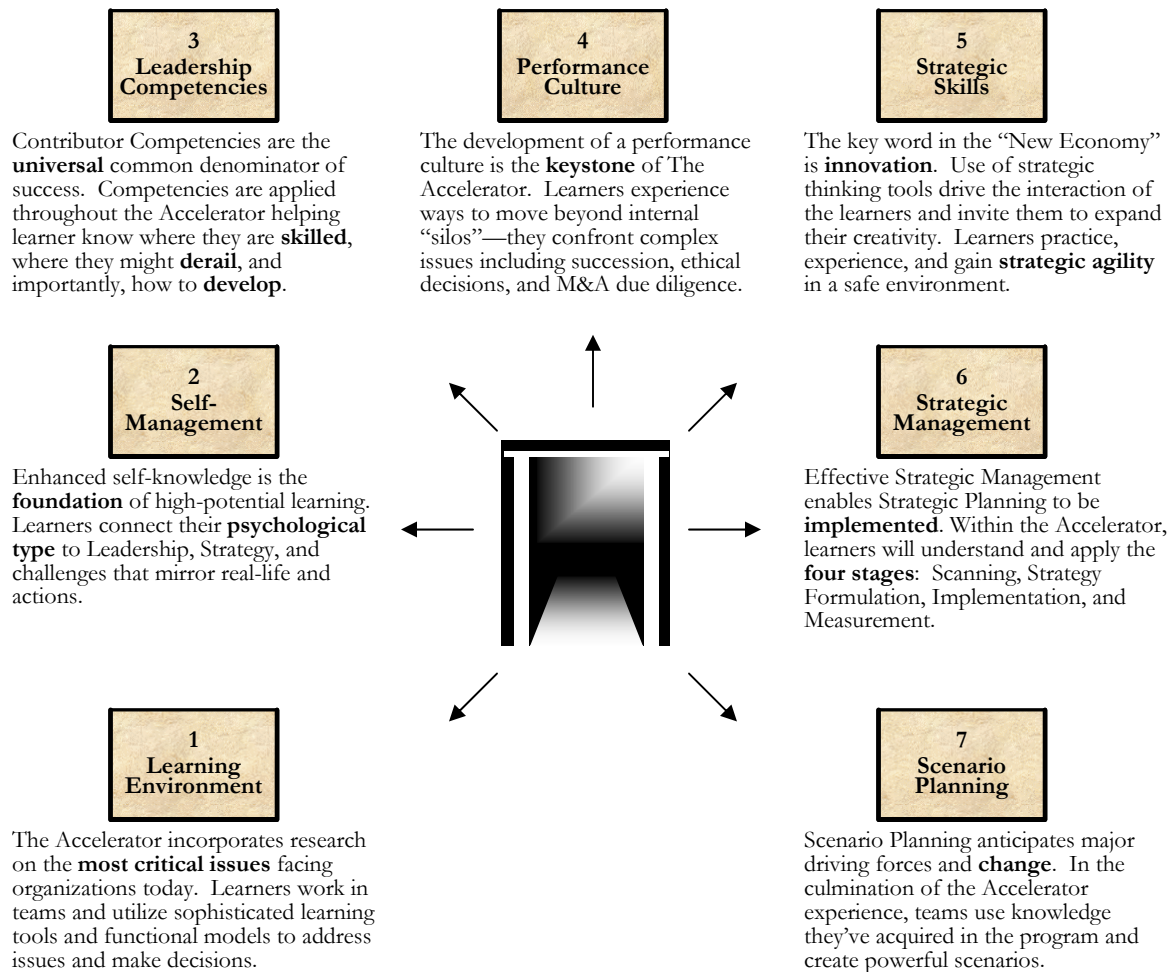

Your key individual contributors are extremely valuable resources...and often they are in critical short supply. The AcceleratorTM cost effectively builds strategic capacity—learners gain exposure, interaction, experience, and insight that would likely take years for them to obtain otherwise.

The Accelerator is designed to help your organization leverage training investments you've made over the years in:

- **Problem-Solving Capabilities**
- **Self-Management Applications**
- **Strategic Skills Development**

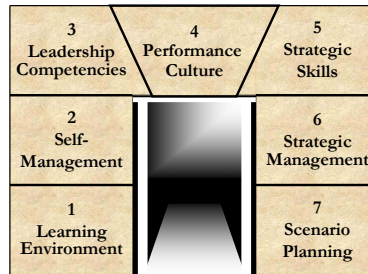

The High-Potential Learning PortalTM provides an overview of the scope of this program and its learning modules. For the learner, the power of the Accelerator is through experiencing the interrelationship of these modules.

THE HIGH-POTENTIAL LEARNING PORTALTM

IT ALL COMES TOGETHER

The Accelerator is based on many years of research and application with thousands of executives in different types of organizations. While expansive in scope, the learning modules all come together through the use a series of graphic management and strategic models.

Feedback shows that the models are a major value-added component. Each is designed to display complex branches of learning “at a glance.” Learners also go deeper into the learning modules—they use subsets of models on varied disciplines including:

Financial Management
Marketing
Human Resources

Operations
Information Technology

Leadership Succession
Due Diligence
Ethics

ONGOING COMPETENCY DEVELOPMENT

All learners receive Lominger’s *FYI For Your Improvement*™ for ongoing development. *FYI* can be used to help establish your critical competencies or enhance the development of the competencies already used by your organization. These competencies can also be integrated with other powerful tools, such as 360° feedback, to meet substantive development objectives.

CUSTOMIZATION & LICENSING

The Accelerator can be further customized to meet your learning objectives. It can be run as a two- or three-day program for 12 to 30 participants. If desired, other learning initiatives you have underway can be integrated into the Accelerator. Licensing arrangements are available.
